## Publisher's Announcement

O THOSE who by their support have made this comprehensive Pictorial Souvenir possible we extend our thanks, and trust the publication meets with their approval. We also desire to extend our thanks to Mr. Joseph E. Hennings, President of the Chamber of Commerce for his hearty co-operation, not alone as the head of that organization, but for his personal and individual efforts to the end that this Souvenir might be not only a success, but complete and accurate. To The Indianapolis Engraving & Electrotyping Co., of Indianapolis, Indiana, for their excellent halftones and prompt service. To the photographers of Anderson for their various efforts. To the Central Indiana Gas Co. for their courtesy in the loan of numerous cuts and halftones. To Mr. J. M. Benham, of the Benham Printing Co., who was the successful bidder on the printing of this publication, for his untiring efforts toward efficiency, which we believe all will admit has been successfully accomplished. Particularly is credit due to Mr. Neel McCullough, cashier of The Citizens Bank, and treasurer of the Chamber of Commerce, not only for his personal and liberal support and that of the bank and every enterprise with which he is connected, but especially for his hearty moral endorsement, which was the means of the largely increased circulation, and we trust that he feels that his confidence was not misplaced.

In a work of this character, which is for the public good, the publisher usually meets with, "leave it to the other fellow," from the majority in his solicitation.

Anderson has been a surprising exception to the rule. Anderson should be proud of its Chamber of Commerce and its unselfish and efficient officers.

And we trust all will feel kindly toward, yours truly,

HENRY R. FISH, Publisher.

## “ANDERSON IN A NUTSHELL”

The development of Anderson as an industrial center has never been of mushroom order. Since the discovery of gas in the year 1887, Anderson has had a steady growth, both in population and in industries.

Anderson is located within 85 miles of the center of population of the United States.

The population of Anderson is conservatively estimated at 30,000.

Products are raised on up-to-date farms around Anderson that find a ready market everywhere.

Anderson is a city that owns and operates public utilities.

Anderson is free of debt as a city, the result of owning the electric light and power plants and the waterworks plant.

The city tax rate of Anderson is only 65 cents on the \$100.00 valuation.

The assessed valuation of property in Anderson is \$11,000,000, and at the present time there is an available margin of \$198,000.00.

The valuation of the Electric Light and Power Plant is over \$1,000,000.

The valuation of the Waterworks and Filtration Plants is over \$1,500,000.

The value of Fire Department property is \$75,000.00 and it may be stated that the Department is now undergoing motorizing of equipment.

The estimated value of school property in Anderson is approximately \$526,000.00.

Anderson's financial interests are well taken care of by four banks, three trust companies and one loan association. The combined capital of the eight institutions being over two million dollars.

Anderson also has the distinction of being the home of Madison county's oldest financial institution, the Citizens Bank, established in 1855.

The value of Park lands owned by the city is \$50,000.00.

The low rates for light, power and water, together with the small city tax rate means much to industries that are seeking new locations, to reduce their overhead expenses. Investigate Anderson.

The patrons of the Light and Water plants enjoy the lowest rates in the country. Electricity for lighting purposes is as low as one and three quarter cents per K. W. Hour, and the rate for power is as low as one and one quarter cents per K. W. Hour.

Anderson has 2571 users of filtered water on flat rates.

Anderson has 30 miles of paved streets, and at the present time most of the important roads leading into the city are being improved with concrete paving, enabling the public to enjoy the benefits of the best constructed roads.

The sewerage system of Anderson extends over a 25 mile radius.

During the past year the main business district of Anderson was equipped with the cluster light system which added much to the attractiveness of the city.

Close proximity to the coal fields enables the purchaser to obtain a low rate for coal.

The banking facilities of Anderson are excellent, there being eight banking institutions with cash deposits amounting to \$7,000,000.

The excellence of the Fire Department is attested by the fact that out of a total valuation of property involved in fires during the past year, of \$430,067.50, there was only a loss of \$35,813.54, with a total insurance of \$194,850.00.

Crime is at a low ebb in Anderson owing to strict law enforcement and the work of an efficient police department.

The Health conditions of Anderson are of the best, the affairs being handled by a competent Health Board, which is active at all times.

Anderson is the county seat of Madison County, the third largest County in Indiana. There are three incorporated towns in Madison county.

## THE CHAMBER OF COMMERCE

The Chamber of Commerce of Anderson, Indiana, was organized March 3, 1914 with a membership of three hundred, and in the month April 1914, the membership was increased to over 1,000 members, which is the largest civic body in the United States for cities of 30,000 population. The large membership working in harmony intensified the community spirit and a general optimistic spirit prevailed during the time of nation-wide depression. The Chamber of Commerce worked unceasingly during the year 1914 for the betterment of industrial conditions and was successful in locating six splendid manufacturing institutions.

The work of the Chamber of Commerce is divided into four Bureaus: The Civic Bureau; Industrial Bureau; Trade and Commerce Bureau and Traffic and Transportation Bureau. Under these Bureaus, thirty-five committees transact the work of the Chamber, and special committees are appointed from time to time by the President.

Several general meetings of the entire membership of the Chamber have been held during the past year, being largely attended, and a spirit of co-operation exists between the members, officers and directors, thereby accomplishing achievements.

The dues of the Chamber of Commerce are nominal, and within reach of everybody. The Chamber of Commerce desires to increase the membership at all times and the newcomer to Anderson is earnestly requested to join the ranks and become identified with the Community Spirit.

Information concerning Anderson that may have been inadvertently left out of this book, will be cheerfully furnished by the Chamber of Commerce.

Anderson—"In the Heart of the United States"—bids you welcome.

## CHURCHES

Anderson has thirty-five churches, some denominations in the past few years having erected some magnificent church edifices. The cream of ministerial talent is procured for the churches of Anderson and the membership of the churches extends into the thousands.

## SCHOOLS

The Anderson Public Schools, under the supervision of a competent Board of Trustees and the forceful leadership of Superintendent Denny, is noted throughout the United States. Anderson has 12 splendidly equipped school buildings that house over 6,000 pupils.

The Manual Training High School, erected at a cost of \$240,000, has a total enrollment of 725 pupils. This institution is modernly equipped in all branches, the faculty of which numbers thirty teachers. The total number of teachers in the various other buildings, including special instructors in music, drawing, manual training, athletics, etc., numbers over one hundred. Graduates of the Manual Training High School are admitted upon their diploma to all colleges belonging to the North Central Association of Colleges and Secondary Schools. The home-seekers will find the schools of Anderson satisfactory in all respects for their children.

## PAROCHIAL SCHOOLS

The number of pupils in St. Mary's Parochial School is three hundred. Eight teachers supervise eleven grades in school, including High School. The value of school property including church equipment is \$125,000.00.

## UNITED STATES POST OFFICE

Located in the heart of Anderson, the United States Post Office Building adds much to the attractiveness of the city, being built of stone and surrounded by well kept lawns. The affairs of the Post Office are conducted in a systematic manner by Postmaster Henry P. Hardie and his Assistant, Mr. M. L. Cromer. There are fifteen city carriers, thirteen rural route carriers; fifteen clerks, together with a Superintendent of Mails, Mr. A. A. Campbell. The Post Office receipts in 1909 were \$66,714.02; in 1912, \$88,276.12; in 1913, \$91,100.03 and in 1914, \$107,088.90.

## CARNEGIE PUBLIC LIBRARY

Through the generosity of Andrew Carnegie, and with the addition of funds furnished by the city, the Carnegie Public Library was dedicated April 20, 1905. The total cost of the building, including site and furnishings amounted to \$77,000.00. The library has at the present time 24,000 volumes and there is an average of 201 books loaned each day, besides the loan of books to public schools. The library building is centrally located and is a building of architectural beauty.

## HOSPITAL

St. John's Hospital located in the south part of Anderson is an institution of city pride. Erected at an expense of \$150,000, it has every facility that goes to make up a modern hospital. The site covers twenty-three acres, and recently a new building with sixty-two rooms has been erected at a cost of \$125,000 without furnishings. The new building has an operating suite, a maternity room, X-Ray suite, three clinic rooms, in fact everything that makes a complete, modern hospital. The hospital is conducted by the Holy Cross Hospital Association.

## Y. M. C. A.

Anderson has the opportunity to possess a Y. M. C. A. building that will cost \$250,000.00. The late James A. J. Brunt of Anderson, a man interested in the welfare of the youth of the city, put in trust the sum of \$125,000.00 to be used in erecting a Y. M. C. A. provided the citizens of Anderson will raise in the next six months a like sum. Work is going on towards the raising of this fund.

## RAILROADS

Anderson is situated on the main divisions of the P. C. C. & St. L. Ry., The Big Four Division of the New York Central Lines, The Central Indiana Railway (leading direct to coal fields) and the Union Traction Company of Indiana, which operates an interurban system over the entire state and is connected with other interurban lines throughout Ohio, Michigan and Illinois. The fine railway service expedites freight shipments on all the roads—a point that all manufacturers recognize and value.

## COUNTRY CLUB

Just north of the city is located the Country Club, which maintains one of the finest golf links in Indiana. The club is in easy access of the city and has a large membership. It is a popular place during the spring and summer months.

## FRATERNAL SOCIETIES

To the home-seeker Anderson can say: "Your lodge is here." All the prominent fraternal societies are represented in Anderson, several including the B. P. O. Elks, Fraternal Order of Eagles, Odd Fellows and Masons having their own homes. It is understood that the Elks and Eagles have in contemplation the erection of elegant new lodge homes.

## AMUSEMENTS

Anderson has a large theatre, Grand Opera House and several fine motion picture houses that afford amusement the year around.

Much attention is being given to Public Parks and Playgrounds, and during the coming summer months a swimming pool will be established in one of the city parks.

Mounds Park, located three miles south-east of the city on the lines of the Union Traction Co., is a park that attracts nation-wide interest. There are forty acres of land in the tract, on which are twenty-two mounds, which were constructed by pre-historic man. Tourists from all parts of the country visit Mounds Park during the summer months. Numerous seepage springs on this land afford excellent water. Mounds Park has been appropriately named "Indiana's Picnic Ground."

## TRAVELING SALESMEN

Anderson has four hundred traveling salesmen, commission and merchandise brokers, who sell Anderson products. There are two commercial men's organizations in Anderson, Post O Travelers Protective Association of America, with headquarters at the Grand Hotel, and Anderson Council No. 187 United Commercial Travelers of America, with lodge quarters at Eleventh and Meridian Sts.

# THE WARD-STILSON COMPANY

AN INDUSTRY DEVOTED TO THE MANUFACTURE OF ALL  
SECRET SOCIETY COSTUMES, UNIFORMS AND SUPPLIES

This company moved their general offices and factory to Anderson in October 1913, from New London, Ohio, having become convinced that Anderson with its fine shipping facilities and central location was the place from which they could give their patrons the best of service.

The hospitality of Anderson people, the splendid schools and churches, the diversified industries which enables them to secure many of the supplies needed, all had their share in the location of this concern.

That this company has been successful in their field, you may better judge from their growth and progress during the past twenty years—since the business was established in 1895.

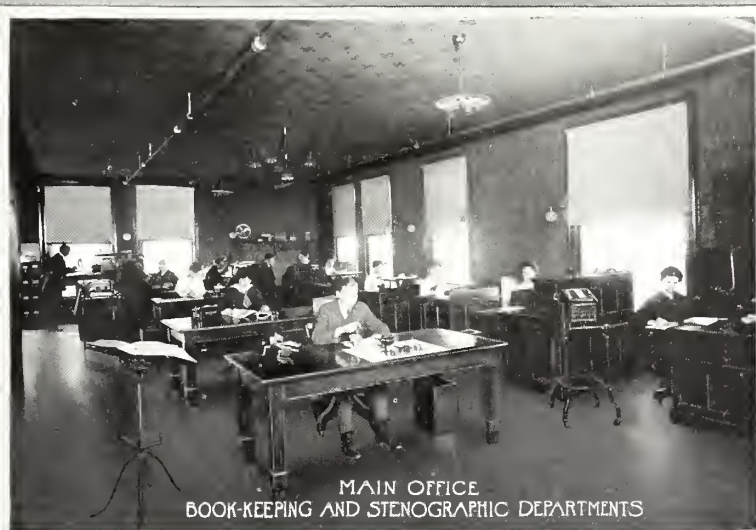

In that year this industry started in a small way without factory or equipment. The business grew, department after department has been added, until today the Ward-Stilson Company stands as one of the finest, and most completely equipped plants devoted to the manufacture of Lodge Costumes and Supplies in America.

On the following pages are shown views of sections of the General Office, the Art Department, Costume Department, the Gold and Silver Bullion Embroidery Department, the Helmet, Badge, Cloth Cutting, Paint, Stock and Shipping Departments, also exterior views of Factory and General Office, located at Seventh and Meridian Streets, and Furniture Department on West Eighth Street.

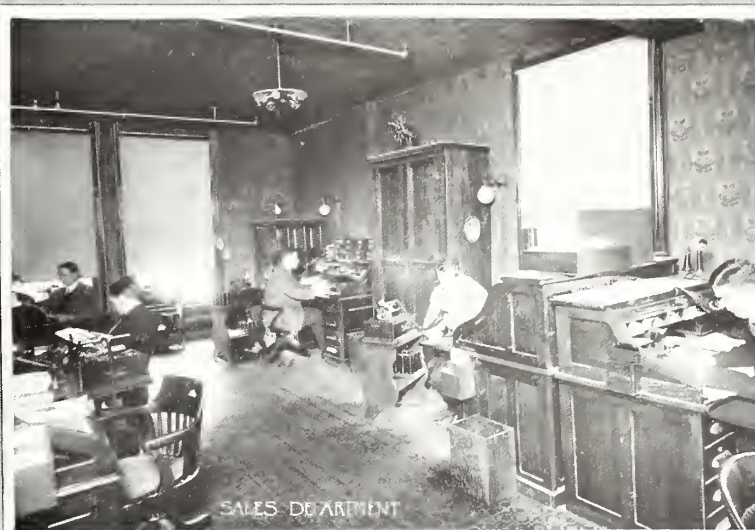

Only recently in order to relieve the growing condition of several departments the Catalogue Circulating and Badge Departments were moved to the Main Street building, which is not illustrated.

# PATENT VULCANITE ROOFING COMPANY

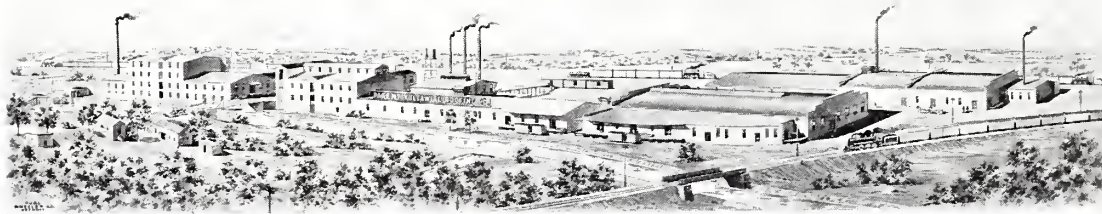

ANDERSON, INDIANA, FACTORY

FROM this modest beginning Vulcanite Roofing has evolved, until today, we have a roofing product that meets the demand of the most exacting architect and builder for beauty, utility, resistance to the elements and reasonable cost of laying and maintenance.

That Vulcanite Roofing has won for itself a most enviable reputation is evidenced by the views of three of our five big factories devoted exclusively to the manufacture of Vulcanite Roofing in the United States.

### THE UNION BUILDING. ERECTED 1902

The Union Building, although not the highest, is one of the largest office buildings in the State. It contains two hundred and fifty-four office rooms, or a total of 113,000 square feet of office space, and five store rooms on ground floor. The building maintains its own power, lighting, heating and water plants. Rents are extremely reasonable.

"MADE IN ANDERSON"

"RILEY'S OLD SWIMMIN' HOLE"

COPYRIGHTED

PAINTED FOR JAMES WHITCOMB RILEY

BY WILLIAM A. BIXLER

## WILLIAM A. BIXLER, ARTIST

MEMBER ANDERSON CHAMBER OF COMMERCE

MR. BIXLER is an artist of unusual ability as is evidenced by the fact that his paintings adorn the walls of hundreds of homes and school buildings throughout the United States. He makes a specialty of oil paintings to order, from photographs, of scenes, etc. He also makes a high grade of scenic backgrounds used in show windows by merchants throughout the country.

MR. BIXLER is a naturalist—not only in painting it with his brush, but also writing of it, as well. He has written a creditable book entitled "THE WONDERS OF NATURE." The work is illustrated by his own photographs.

A FEW years ago Mr. Bixler visited Greenfield, Indiana, the birthplace and boyhood home of James Whitcomb Riley. He afterward painted a picture of the famous "Old Swimmin' Hole," a photograph of which is here shown, and presented the same to the Hoosier poet.

THE great pleasure it gave Mr. Riley and his appreciation of the artist's skill was shown in the following letter:

MR. WILLIAM A. BIXLER,  
ANDERSON, IND.

DEAR MR. BIXLER:

Mr. Riley is delighted with your excellent oil painting of the "Old Swimmin' Hole."

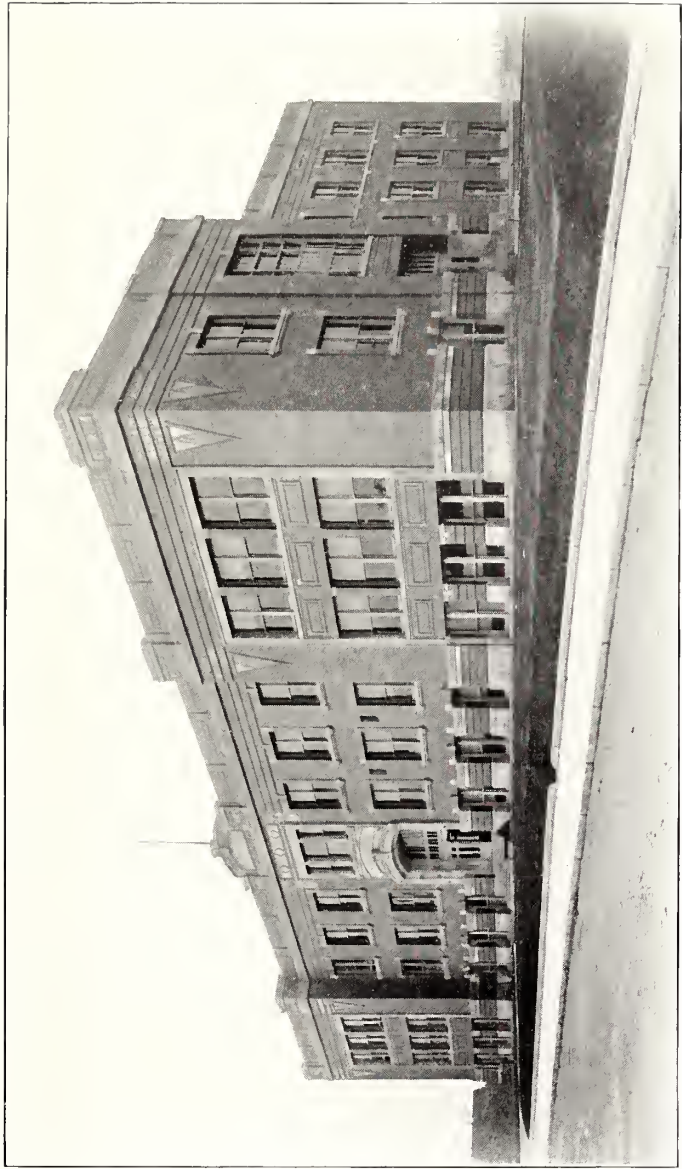

He wants me to tell you how pleased he is with it, how it brings back the old days; and how more than grateful he holds himself to you.

EDMUND H. FITEL,  
Secretary.

## THE MODERN BUSINESS COLLEGE

“CONSCIENCE IN BUSINESS” is the motto of Miss Della C. Miller, whose school located in rooms 264-252 Union Building, is one of Anderson’s established educational institutions. Miss Miller graduated from the Rochester Normal University; specialized in Indiana State Normal; taught several years in the Public Schools of Indiana, and in the Government School at San Juan, New Mexico; graduated in 1912 in the Stenotype Class at Owensboro, Kentucky. Since re-entering the teaching profession she has successfully taught in several other Business Colleges.

Her professional efficiency and business ability are demonstrated by the fact that she has located about 200 of her pupils in our local offices, and placed pupils from neighboring towns here on a few hours notice. Prompt answers will be given to all inquiries concerning courses, rates, and prospects of locating satisfactory students in good paying positions.
